

The JOB & ACTION series contains free standing chairs. They have ergonomic design, high durability and functionality for many hours use.

Technical Characteristics of ACTION chairs

General:

ACTION series' chairs are designed to fulfill mainly to two requirements: a) high endurance for frequently (all day and every day) use and b) excellent comfort for long lasting work.

They could have 4 legs frame or they could be fixed on metal beam or they could be swivel on castors.

Chair can be equipped with polyurethane armrests with metal inner frame.

All metal parts are painted with epoxy powder.

The customer can select the upholstery from our wide fabric range. Other fabric collections are available upon request. All fabrics and foams comply with European or other Flammability Standards
