

## acoustic improvement

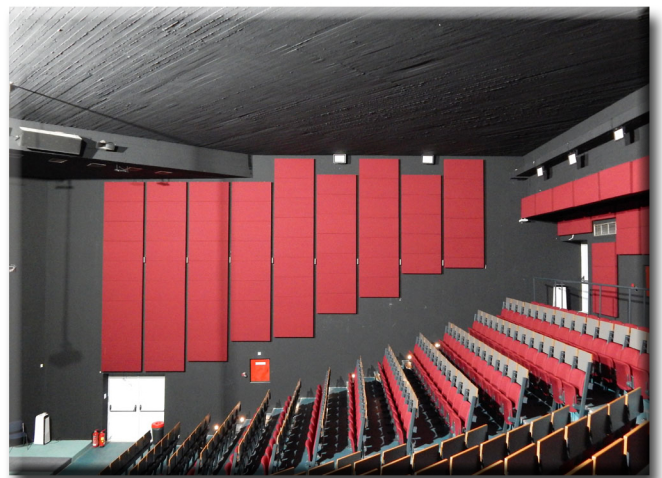

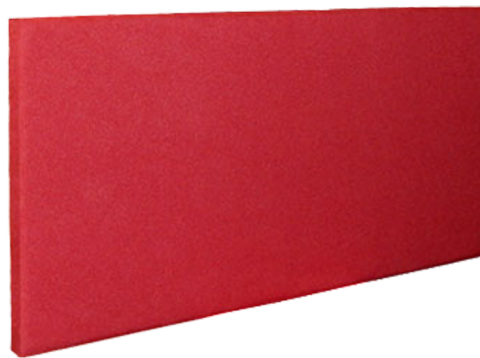

Acoustic Improvement of an area affects the total quality of the offering services especially when regards public places like theaters, cinemas, music halls and educational rooms.

BIRO develops and produces Sound Absorbing Panels which can be placed and improve the acoustic of an area.

Size and shape varies according to the specific acoustic and architectural needs.

Panels could be naked or upholstered with fabric.

A suspending system according to the particular surface ensures the stability and easy placement.

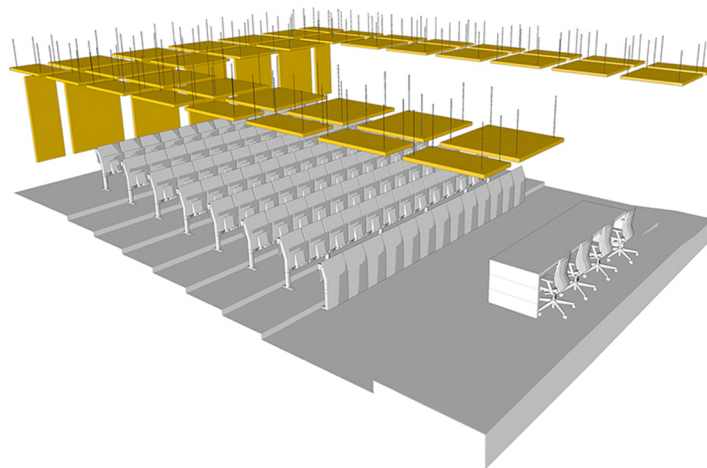

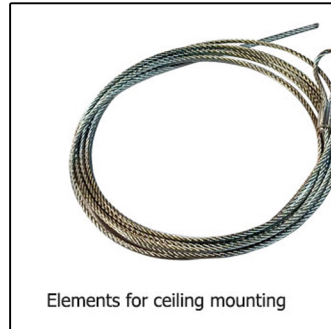

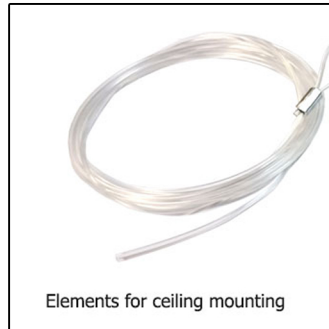

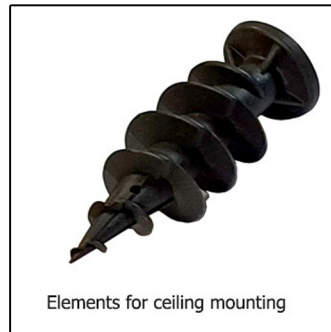

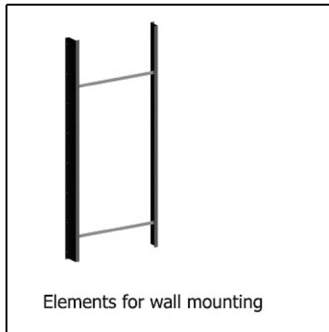

**PANEL** sound absorbing

Wall mounting  
 Ceiling mounting  
 Free standing panels  
 Desktop partitions for desks / working stations  
 Upholstered or naked in several colours
